---

*Modification of land history may be approved by the Idaho Crop Improvement Association, Inc. Boise office, when a cultural practice has proven to be successful. Cultural practice may include mechanical means such as deep plowing and/or chemical means such as fumigants or other material for seed bed preparation. Materials and methods must be a matter of record. Whichever method is used, it must be approved and adequate to maintain varietal purity. At no time may the time interval for land history be reduced below the requirement as stated in the United States Department of Agriculture, Part 201 - Federal Seed Act, for Certified Seed Regulations for specified crop and appropriate certified generation. To aid in distinguishing between volunteers and crop seeded, the seed must be planted in distinct rows but may vary in row spacing. (Idaho Rules & Regulations, General Pg 8, 1/95)*
